

The Largest Brewery Equipment Manufacturer in Asia

- Lehui has a complete product range of brewing and packaging equipment, which allows us to excel at providing turnkey project solutions at competitive pricing for both large and craft breweries.
- With over 26 years of experience designing, planning and installing professional brewing projects around the globe, you can count on our expertise to meet your equipment requirements.
- Lehui can also manufacture equipment under private label offering the flexibility to collaborate with engineering companies with custom designed products backed by world-class quality and quick lead times.
- Well versed in global sales and logistics to ensure a successful project, Lehui is also seeking professional engineering companies to act as an agent outside of North America.
- NDL is our strategic partner for North America, based locally in the metro Detroit area, assisting with turnkey solutions, expansion projects, service and freight management. NDL can provide the answers to ensure you're making a confident purchase decision.

Craft Brewhouse

- Four-vessel brewhouse.
- 20-80 bbl per batch with 4-10 batches per day
- Consists of modules for raw materials handling, brewing, fermenting, etc.
- Pre-assembled before delivery for easy on-site installation.
- Lehui's BrewTech semi-automated or fully automated control technology allows for easy brewing.

Mobrew Modular Brewing System (Patented Product)

- Mobrew is a mobile brewery on wheels that integrates the complete brewing process from raw materials to packaging.
- Annual production capacity of Mobrew ranges from 700 to 10,000 hl
- Mobrew uses MoTech intelligent brewing software and control systems.

Malt Mill

- Processes 500 kg of malt per hour.
- High-speed milling.
- High efficiency to ensure broken malt grain husks are intact.
- Simple operation.
- Easy installation.

Fermentation & Brite Tanks

(Fermentation Tank)

(Brite Tank)

- Laser-welded jackets with quality assurance for 10 years.
- Traceable manufacturing process documented for quality.
- Standard designs in ASME, PED and AS1210, etc.
- Quick delivery for standard models.

Pub Brewhouse

(North American Style)
(Mash/Lauter Tun & Wort Kettle/Whirlpool)

(European Style)
(Mash Tun/Wort Kettle & Lauter Tun/Whirlpool)

- Two-vessel brewhouse with option of North American or European configuration.
- 5-20 bbl per batch with 2-4 batches per day
- Modular design to save space. Options of stainless steel or copper-clad design.
- Highly efficient and cost-effective brewing.
- Lehui's BrewTech semi-automated or fully automated control technology allows for easy brewing.

CraftCan

- Up to 18,000 cans per hour.
- High precision.
- Compact integrated design.
- Equipped with can seaming machine.

CraftBottle

- Up to 10,000 bottles per hour.
- Open designed capper head that is easy to clean.
- Low-speed line with low complexity and simple technology for high efficiency.
- Compact layout, enabling 1-2 people to operate.

CF55 Cask Filler

- Hygienic design - food-grade hoses and stainless steel construction.
- Low loss - beer flow is controlled, full filling reduces fobbing and prevents spillage.
- High efficiency - filling time can be reduced.
- Compatible with multiple cask sizes.

CW60 Cask Washer

- Low loss - no need to drain or pre-wash cask.
- Easy-to-use touch screen and one-button washing for convenience and efficiency.
- No trap point - guards on all moving parts.
- Compatible with multiple cask sizes.

KWF35 Keg Washer & Filler

- Up to 70 kegs per hour (Two sets).
- Cleans and fills automatically.
- Keg pressure seal check.
- Meets all international safety standards.
